

# Cedar Talk

VOLUMN 3, ISSUE 2

SPRING 2007

## Cedar Creek

### CANOE AND KAYAK

Another canoe and kayak season is here. It is important to inspect all your equipment for damage caused from storage or perhaps winter weather.

A special look at all your floatation devices for dry rot, rips and tears will help make your water adventure a safe one.

Our 2007 canoe and kayak season opens on May 5th. Inquire at the office for reservations.

### REMINDERS

- \* Look, and listen for running water leakage after connecting our water to your rig.
- \* Check all trailer supports and jacks for any possible land erosion that could make your rig unstable.
- \* Make sure that your sewer doughnuts are serviceable.

## Welcome Home

Welcome Home everyone. The staff here at Cedar Creek campground have had a very wonderful winter season, and are excited to see all of our 2007 guests.

We have been busy making some subtle changes to our facilities, some that will be easily noticed and others that are mechanical. All done with the intention of providing *YOU*, our

most important asset with the best facilities available.

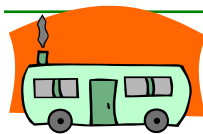

We have renovated our canoe bathrooms on the east side of the registration building, and have

reconditioned the hardwood flooring in the café.

In addition, we are in the process of making many necessary road repairs and retaining wall replacements.

Additionally, we have booked many new events and talents for the upcoming summer season, and are sure that they will provide you with numerous hours of laughter and entertainment.

So pull out the awning and dust off the yard furniture and we'll see you 'round the campfire.

## CHECK THE WIRE!!!

With the start of the new 2007 season, there are a number of concerns that campers should be aware of with regards to their electricity.

### CHECK THE WIRE!

Make sure your campers

electrical wire is free of any defects and the plug is not damaged.

Make sure that you do not overload your circuits by using extension chords that allow for multiple appliances to be plugged in.

Turn your circuit breaker in your electric box outside your site off before plugging in, and slowly turn on the appliances one by one.

Lets have a **SAFE** season.

## OUR COMMUNITY

### Getting Ready for 2007

Our new shower enclosures.

Chris putting a trailer on site for a new seasonal family.

March snow getting in the way of things.

### Taking advantage of expanded daylight savings time.

While many of us can find numerous complaints with the politicians in Washington D.C., I have yet to meet anyone who is unhappy with the expanded daylight savings time. It is one law most people love.

With this additional daylight, we can find many an activity to do around the house as well as recreational outings with the family.

A family bicycle ride is a great way to get aerobic exercise and spend some quality time with the family.

Perhaps a quick eighteen holes of golf at our favorite golf course, Cedar Creek Golf Course.

No matter how you spend the extra time in the evening, spend it with someone you care about.

### Our Seasonal Social

This year, our Seasonal Social will be on Saturday, May 19, 2007 at 7pm. It is a great way to touch base with your "fair weather" friends, and meet the newest members of the Cedar Creek Campground family.

As usual, there will be coffee and cake as well as a few other surprise sweets for all.

It is also a great time to

discuss upcoming events, as well as meet the new office and grounds staff that are part of your extended family.

We hope all our seasonal campers will find a few moments of time to join us in this gathering.

See you there!
